Jančina
ARCHITEKTI

Since its inception in 1992, by Ing. arch Juraj Jančina, the group **Jančina Architekti** has aimed to provide comprehensive services to its clients in architecture, interiors & graphic design, planning & urban design, engineering and project management.

The company's primary objective is to realize its clients' dreams while creating an aesthetic and functional environment for the people. At the same time, the company aims to push the boundaries of today's architecture through research, theoretical studies and development of creative proposals using new technologies.

The team of Jančina Architekti has more than 40 specialists, who are able to implement all scales of projects ranging from interiors and building architecture through large urban design & planning complexes. The quality of services we provide and successful realization of our clients' imaginative ideals are ensured in the knowledge we possess and in the experience we have gathered throughout the work on past projects, whether these are residential, commercial or mixed-use buildings. The solid and well-coordinated team of specialists is always able to respond flexibly to the changing conditions and to assure top performance even in demanding times. This is where we see our strength, and the trust of our clients is the proof that precise work and responsible attitude will find its positive feedback - **1 000 000 sqm realized.**

„we Listen, we Think, we Create and we Realize“

Transcontinental Transit Terminal - T.T.T.

It is the only, biggest and most complex 5-modal transcontinental terminal of its kind in the area of Central Europe.

Transit transportation and logistics are one of the possibilities of how to utilize the expansion and overpressure of Asia and reach the state of equilibrium that would guarantee stability and progress of the region, EU as a whole, even the planet itself and so supporting the development of cooperation and national interrelation.

The Transcontinental Transit Terminal is an ambitious project of the third millennium. It has ambitions of transport, logistics and technology as well as ambitions of the whole range of complementary services and branches that are included in the transit-logistics industry – starting with IT technologies used for traffics' coordination and the goods' manipulation technologies to the development and following application of new transportation means.

The primary goal and main focus of the T.T.T. project is construction of the largest European transport node in the best possible relevant strategic location.

Recently, Jančina Architekti in cooperation with deputies of state administration and public sphere, have succeeded in inclusion of the T.T.T. project's proposal into core and strategic national documents, notably:

- Strategy of the Slovak Republic until 2020
- Strategy of the Slovak Republic Transport Policy until 2020
- National Position on the Danube Strategy

Ligne Roset

Ligne Roset offers consumers an entire lifestyle in which to live both boldly and beautifully via its furniture collections and complimentary decorative accessories, lighting, rugs, textiles and occasional items.

An additional distinguishing point of difference that sets Ligne Roset apart from other manufacturers is its tradition of investing in dynamic designer collaborations. Creativity is a key value of the Ligne Roset brand: if a new product demands new materials or productions methods, the company will simply acquire them. The idea precedes and the technique follows.

In 2009, Bratislava has also become one of the „Ligne Roset cities“. In the uniquely furnished showroom with area of 400 sqm everyone will find an impulse and inspiration for their own interior. Our qualified interior architects will help you devise your interior and to find the best solutions for your taste and needs, drawing from a wide menu of cushioned furniture, tables, chairs, stowage furniture, beds, wardrobes, lightning and accessories. Preparation of your design proposal in 3D modeling with rendering output is also among our services.
